### Professional Experience

#### Freelance Mobile Application Developer

02/2020 – Present | Remote

##### Self-Employed

Developed and delivered native Android and cross-platform mobile applications using **Java**, **Kotlin**, **HTML5**, **CSS3**, and **JavaScript**. Experienced in **Android Studio**, **ReactNative** and **Apache Cordova**, with expertise in API integration, performance optimization, and publishing apps to the **Google Play Store**. Skilled in implementing push notifications, geolocation, payment gateways, and responsive UI/UX. Successfully completed projects for E-commerce, education, and service based industries, ensuring high performance, scalability, and client satisfaction.

#### Front End Engineer

05/2024 – 12/2024 | Remote

##### DropLeet

- **Built a dynamic and responsive frontend** with **React.js**, leveraging **Material-UI** to create modern, reusable, and visually appealing UI components.
- **Designed and developed** a secure **RESTful API backend** using **Node.js**, **Express**, and **PostgreSql** to efficiently manage workflows for patients, drugs, and hospitals.
- **Implemented user authentication and authorization** to safeguard access to sensitive hospital data.
- **Developed an intuitive dashboard** to streamline key functionalities, including patient details management, drug inventory tracking, appointment scheduling, and advanced search/filter capabilities.
- **Ensured cross-browser compatibility** and **mobile responsiveness** to deliver a seamless user experience across devices.
- Followed **best practices** in modular architecture, error handling, and state management, enhancing the application's scalability, maintainability, and performance.

### Education

#### Software Engineer

2022 – present

1337 School – UM6P

#### Bachelor's Degree in Economics and Managemen

2019 – 2022

University Ibn Zohr
